Typographic replacements

Enable typographer option to see result.

(c) (C) (r) (R) (tm) (TM) (p) (P) +-

test.. test… test….. test?….. test!….

Test MarkDown section

!!!!!! ???? ,, – —

“Smartypants, double quotes” and ‘single quotes’

Emphasis

This is bold text

This is bold text

This is italic text

This is italic text

~~Strikethrough~~

Blockquotes

> Blockquotes can also be nested…
>
> > …by using additional greater-than signs right next to each other…
> >
> > > …or with spaces between arrows.

Lists

Unordered

- Create a list by starting a line with `+`, `-`, or `*`
- Sub-lists are made by indenting 2 spaces:
  - Marker character change forces new list start:
    - Ac tristique libero volutpat at
    - Facilisis in pretium nisl aliquet
    - Nulla volutpat aliquam velit
- Very easy!

Ordered

1. Lorem ipsum dolor sit amet
2. Consectetur adipiscing elit
3. Integer molestie lorem at massa
4. You can use sequential numbers…
5. …or keep all the numbers as `1.`

Start numbering with offset:

57. foo
58. bar

Code

Inline `code`

Indented code

Syntax highlighting

```
// Some comments
line 1 of code
line 2 of code
line 3 of code
```

Block code “fences”

```
Sample text here...
```

Syntax highlighting

```
var foo = function (bar) {
  return bar++;
};

console.log(foo(5));
```

Tables

Option	Description
data	path to data files to supply the data that will be passed into templates.
engine	engine to be used for processing templates. Handlebars is the default.
ext	extension to be used for dest files.

Right aligned columns

Option	Description
data	path to data files to supply the data that will be passed into templates.
engine	engine to be used for processing templates. Handlebars is the default.
ext	extension to be used for dest files.

Links

link text

link with title

Autoconverted link https://github.com/nodeca/pica (enable linkify to see)

link to section

link to other section

Images

Like links, Images also have a footnote style syntax

![Alt text][id]

With a reference later in the document defining the URL location:

Plugins

The killer feature of `markdown-it` is very effective support of syntax plugins.

Emojies

> Classic markup: :wink: :crush: :cry: :tear: :laughing: :yum:
>
> Shortcuts (emoticons): :-) :-(8-) ;)

see how to change output with twemoji.

Subscript / Superscript

- 19^th^
- H~2~O

<ins>

++Inserted text++

<mark>

==Marked text==

Footnotes

Footnote 1 link[1].

Footnote 2 link[2].

Inline footnote^[Text of inline footnote] definition.

Duplicated footnote reference[2].

Definition lists

Term 1

: Definition 1 with lazy continuation.

Term 2 with *inline markup*

: Definition 2

```
    { some code, part of Definition 2 }

Third paragraph of definition 2.
```

Compact style:

Term 1 ~ Definition 1

Term 2 ~ Definition 2a ~ Definition 2b

Abbreviations

This is HTML abbreviation example.

It converts “HTML”, but keep intact partial entries like “xxxHTMLyyy” and so on.

*[HTML]: Hyper Text Markup Language

Syntax highlighting

Custom containers

::: warning *here be dragons* :::

1	Footnote **can have markup** and multiple paragraphs.
2(1, 2)	Footnote text.
